

# Hip Fracture Care\*

Partnered with a regional community hospital to improve the care of elderly fragility fracture patient population

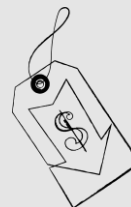

*“By instituting a program that coordinates all aspects of the patient's experience, we can quickly start the recovery process and give patients a better chance of returning to their normal functions.”*

— Orthopaedic Surgeon & Chairman of the Program

## Needs Identification

- Facilitated multi-disciplinary care coordination for the treatment of elderly fragility hip fracture patient population
- Established evidence-based geriatric friendly practices to address the specific needs of this patient population
- Decreased time from admission to surgery and average length of stay to reduce the risk of complications and cost of care

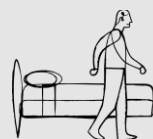

## Delivering Results†

**\$1,000 ↓**  
average savings  
per orthopaedic episode<sup>1</sup>

**28% ↓**  
reduction in time from  
ED to OR<sup>1</sup>

**1.2 days ↓**  
reduction in post-op ALOS<sup>1</sup>

†These are examples only and do not guarantee or predict future results, which will vary depending on individual circumstances.
